Thanks Doug! Appreciate the notes – we didn't hear too much from anyone else, so I'm glad you reached out with these.

**Subject:** Field Hearing Notes

Hi Gail and David,

Just a couple bullets from the field hearing in Sheboygan yesterday. I don't think any of this will come as a surprise so this is a very brief write-up.

- The five-person panel noted that the Kohler monitor is heavily impacted by transport from upwind areas.
- It's unfair that Sheboygan is designated as nonattainment when reductions in Sheboygan would not help the area reach attainment.
- The Kohler monitor data should be excluded from the designations process. The Haven monitor more accurately characterized the air quality in Sheboygan County.
- Businesses in Sheboygan County have made significant reductions in ozone precursor emissions.
- If Sheboygan is bumped up to Serious additional hardships like more stringent NAA NSR requirements, RFG, and vapor recovery requirements could be imposed.

After the panel gave their prepared remarks and answered questions from Rep. Grothman and Sen. Johnson they asked audience members (there were roughly 100) if they had any questions.

- One person asked why there wasn't someone on the panel who could discuss the health impacts of ozone.
- Someone asked if the pollution is coming from upwind if Foxconn has to do anything.

That was about it. Again, I'm not going into a lot of detail here because I'm sure you're heard much of this before but I wanted to pass on the highlights of the meeting. It was about 1.5 hours of the formal proceedings and 0.5 hours of Qs and As from the audience.

Doug
